

The Coal
Authority

Resolving the **impacts** of mining

Mine Gas emissions report

Unique insight into a mine gas liability site

Managing coal mine gas liabilities is part of the Coal Authority's statutory obligations. We can provide expert insight on mine gas liability sites or mine gas incidents that we have treated, featuring a bespoke report from our mine gas experts.

What does it **cover**?

detailed report on mine gas issue at location

reasons for monitoring installation

site details, including plan

photos of the site

details of measures used to manage gas

results of the gas monitoring

Why **you need it**

If a property has been subject to a coal mine gas issue treated by the Coal Authority, this follow on report provides invaluable, site specific details - delivering peace of mind by providing information on our expert mine gas management regime.
